1. The following is an examiner's statement of reasons for allowance: the closest prior art WO 90/04609A (WO'609A) teaches a surface modification process wherein a substrate material comprising functional groups on the surface is modified by a linking compound comprising multifunctional groups including epoxy groups that react with the functional group on the substrate surface as well as functional groups of a subsequently applied polymer material. WO'609A does not teach or fairly suggest that the linking compound is an epoxy polymer having a number average molecular weight of about 2000 or greater wherein the epoxy polymer is crosslinked via a portion of the epoxy groups on the polymer to form a crosslinked polymeric anchoring layer bound directly to the substrate material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R. Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on 571-272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
